Introduction:

Basketball is a team sport where every member plays a crucial role for the success of the team. We nurture our players to develop strong team spirit and commitment not only in the court arena, but also in the arena of academics.

The Outreach and Basketball Clinic Programmes are our signature programmes in which we empower our players to lead and create an outreach programme to primary six pupils from schools across Singapore. Our overseas learning journey which is organized once every two years gave our students opportunity to spar with better players so that they are able to pitch their performance to higher standards and sharpen their skills further.

Students can look forward to strong camaraderie amongst team members and learn to cheer each other on and off the court.
